			Quantity	NEPA Action		2		2	2		
1	Comparative Effectiveness Research	AHRQ Comparative Effectiveness Research: AHRQ's comparative effectiveness research will provide information on the relative strengths and weakness of various medical interventions. AHRQ's investments will expand its Effective Health Care (EHC) Program. This effort will increase the national output of comparative effectiveness research; in addition, it will build research infrastructure and capacity, allowing future studies to address questions where data are currently not sufficient to provide guidance about competing alternatives and to improve the efficiency with which the research infrastructure is able to respond to pressing health care questions. Research activities will be performed using rigorous scientific methods within a previously-established process that emphasizes stakeholder involvement and transparency, that was designed to prioritize among pressing health issues, and whose products are designed for maximum usefulness for health care decision makers. AHRQ employed grants (63), contracts (19), and salaries and benefits to undertake this research for a total of 82 activities.	1	CE	Done	1		4/24/2009	Yes		
2	Comparative Effectiveness Research	OS Comparative Effectiveness Research: The Office of the Secretary was allocated \$400 million for CER by ARRA legislation. The projects funded through the OS spend plan will complement the operational CER plans from NIH (\$400M) and AHRQ (\$300M) in order to lay the foundation for a robust, high-impact, and sustainable CER enterprise. The OS draft spend plan highlights 27 project across the Staff Division and the Operating Division of DHHS. The projects will focus on the following high level topics: Data Infrastructure; Dissemination and Translation; and Interventions. The OS employed grants (87), contracts (25), task order contracts (23), and salaries and benefits to undertake this research for total of 135 activities.	1	CE	Done	1		8/8/2009	Yes
