CQ226

Dear Sirs,

I am not happy with the decline of usa standards on pollution controls i dont especially like a concrete jungle thats unaffordable unsafe unsightly and dangerous. I dont think there's any hope in pointing out that theres no heaven no supernatural place to go and this is all there is without arguement from one ancient wisdom seeker or another.

I am not happy with fossil fuels geothermal power or mining logging the byproducts waste toxins general filth that happens. Basicly its come to my attention greenpeace switched sides pulled out no offices here thousands in other countries.....meaning your doomed we are doomed.....your minds are not as good as thiers.....its that simple there is nothing you can do but do whatever they suggest as they consistantly prove thier far more intelligent than you are and any attempt at conning the public wont work.

I know when i am surrounded eventually court cases giant fines refusals to pay and miltary intervention economic intervention etc. The sept 11th event was primarily seen as usa economics go home your trade finances laws policies were pointed out by foriegners for economic military and religious reasons.....uranium enriched hardened warheads against treaty on foriegn soil to control iraq's oil prices by embargo increase global warming.....lost support of every country on earth.....12 years of no enviornmental policy the worlds premier org greenpeace pulls out goes foriegn and on and on...

Qwit turn your org over to greenpeace let them handle it completely.....back the winners.....let them handle it bail....its over at the rate your going we will see commie foot soldiers comming up from south america in less than 30 years way less its over completely i know when i am surrounded.....

Jay
