NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Vilas keith

Email Address: vilaskeith@hotmail.com

Comments: NEPA was established to provide public input into actions such as logging in national forests. I would urge that this piece of important legislation not be changed. It is one of the decreasing venues left for American citizens to object to such measures and at least slow the selling of America's natural resources by the federal government to big business. At a time when shortsighted business interests play an increasing role in forming our national environmental policy, it is all the more undemocratic and unamerican to limit the ability of our citizens to be involved in this process. Please recommend that NEPA remain unchanged. Thank you.
