NEPA Task Force Web Site Reports a New Feedback Entry:

Name: Mike Clayton

Email Address: mclayton2000@cox.net

Comments: 1. James Watt was wrong and we threw his out.
2. The Sierra Club was also wrong so we stopped listening to them.
3. Please ignore the timber and mining interests (like Watt's old organizations) and also the Sierra Club's view at this time.
4. Listing instead to the scientists, and conservationists (as opposed to the profiteers and preservationists) and really beef up the beef first, then you will have credibility for cutting out the fat! Its about CREDIBILITY and so far, your admin is missing that on environmental issues. Here is your chance to do the Texas thing and make more beef!
