CQ415

September 13, 2002

To whom it may concern,

The National Environmental Policy Act should be kept the same as it was when it was first established in 1969 by Nixon. It has a very positive effect and should not be changed.

I do not approve of the alterations being made to the NEPA. As the White House Council on Environmental Quality Task Force, you should not support the changes and do everything possible to make sure they don't become official. Thank you for your time.

Sincerely,
Maeve Gould
