September 13, 2002

White House Council on
Environmental Quality Task Force
P.O. Box 221150
Salt Lake City, UT 84122

To the committee:

It is my hope that your committee, upon review of National Environmental Policy Act (NEPA), will recognize its extreme significance and indicate this importance in your report to the nation. This law enables governmental analysis of potential environmental problems before they happen. There is no need to alter it in any way that would further allow the disregard of the environment in economic decision making. Let's not allow the Bush administration to tear down another shield of environmental protection.

Sincerely,

Evan Davis
