Subject: The White House Council on Environmental Quality (CEQ) Task Force

09/24/02 10:34 AM

I request that you re-open the comment period relating to The White House Council on Environmental Quality (CEQ) Task Force. PLEASE review the National Environmental Policy Act (NEPA) and examine opportunities to modernize NEPA analyses and documentation to improve the coordination of NEPA processes between all levels of government and the public. I have submitted NEPA comments to the US Department of the Interior and USDA, but was not notified of this proposal. I believe that everyone who has submitted a comment within the past few years should be notified and should also receive a copy of the Environmental Assessment (EA).

Therefore, I formally request a copy of the EA for this action. Thank you for your time and anticipated cooperation.

Please send to:
